Interconnection of Public Registers

The Puzzle

Interconnection of Public Registers

The Goal

- To develop a system for **exchange** of data between registers and information systems in public administration, as well as entitled users, which in a secure and standardized way enables to access the data in registers.
- Based on National interoperability architecture

INTEROPERABILITY Projects Across Borders

✓ ECRN

✓ European Civil Registry network

✓ Pan-EU

✓ Registration of EU citizen

EUROPEAN COMMISSION ICT CIP 2007-2013

ECRN is a part of the ICT PSP (Information and Communication Technologies Policy Support Programme) initiative under the Competitive and Innovation Programme (CIP) which support projects with innovative value for advanced technological solutions.

Sectors : eGovernment & eInclusion

Pilots

ECRN is a pilot service for cross-border transfer of information related to a citizen's Civil Status at a European level.

- Birth certificate
- Death certificate
- Marriage licence

project consortium:

-
- 2 participants
-

countries

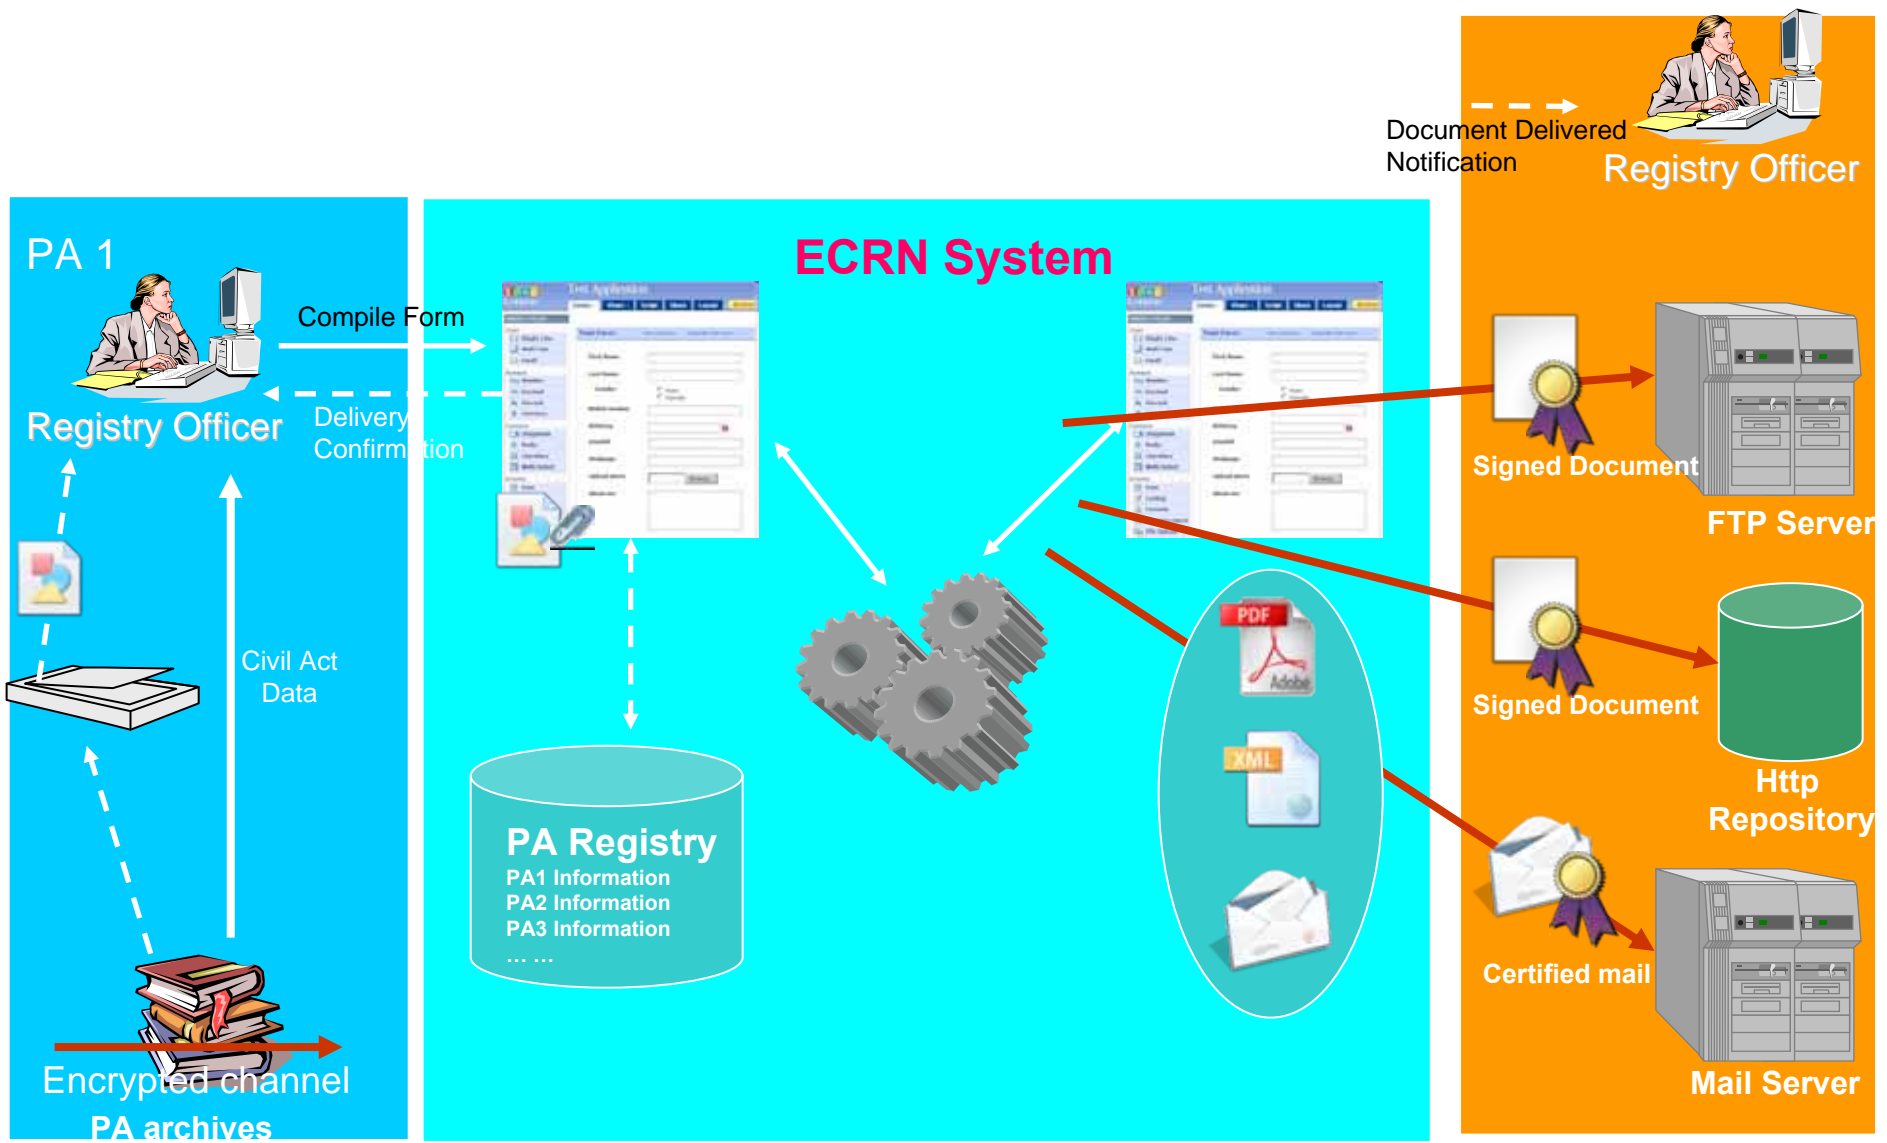

Focus : a real life scenario: a marriage in Belgium

- Alberto is an Italian citizen of Bologna who currently lives in Gent, Belgium.
- Alberto will marry Kathleen, who is a Belgian citizen.

A public official in Gent will use the ECRN system to inform the Register authorities of Bologna of the following:

- Identification of Public Services
- Authentication of credentials
- Selection of the receiving Public Administration
- Preparation of information to be transferred
- Digital signature for sending Information
- Transfer using the certified electronic e-mail

How to...

- Identify the civil servant
- Authenticate credentials

• Identification

- will be defined developed in cooperation with STORK (ICT PSP Pilot A)

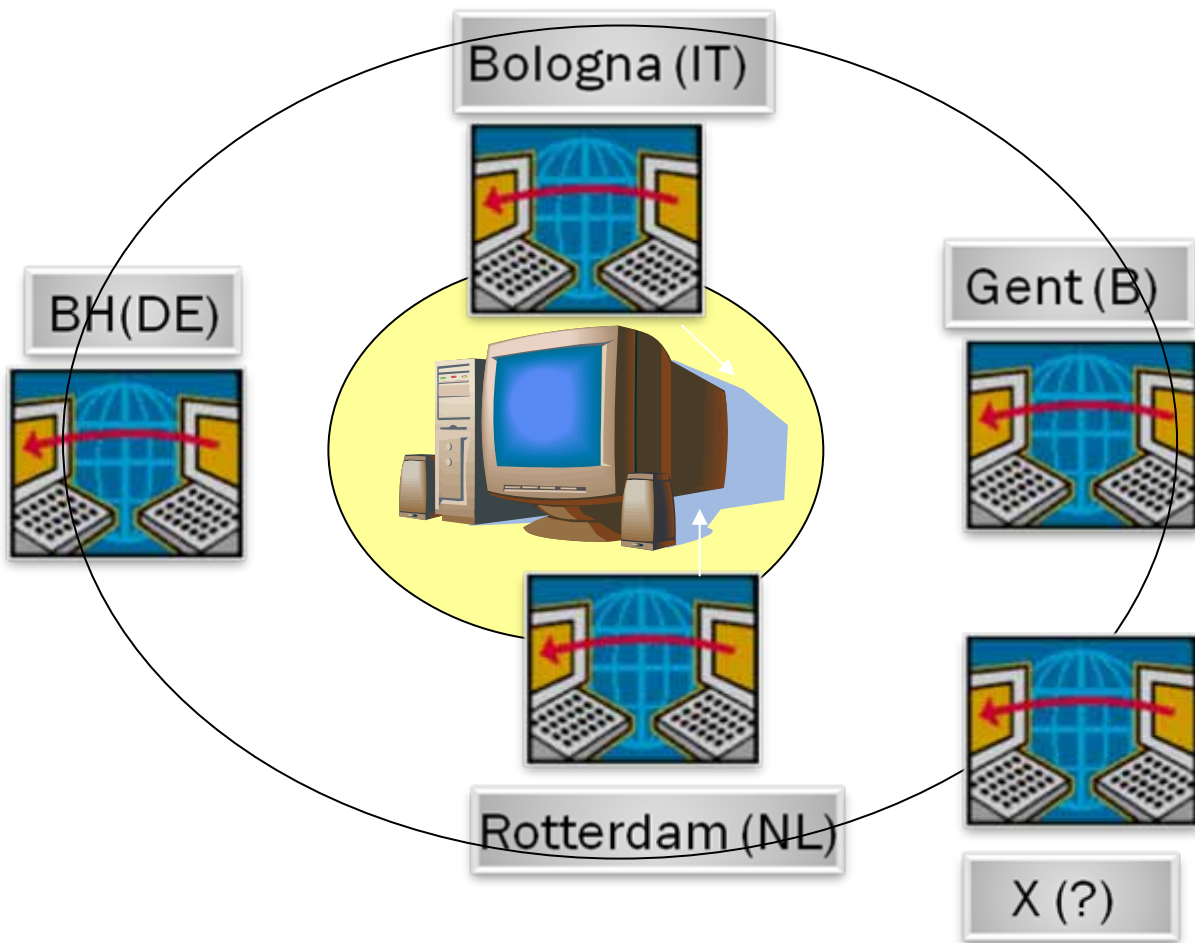

• Authentication

- will build on experience from W-Spes (eTEN)

Pilots

Pilot B Objectives:

- Standardization
Civil Act- multilingualism
Vienna 1976
- Electronic transfer of
digital documents
Among A - B - C - D - X
- Management
of the
Public Administration
Registry
- Interoperability European
Standard

Expected series of pilots with effective document transactions of a total of about 500 in the 4 sites

Pilots

Four pilot sites involving registry offices:

- ❑ Municipality of Rotterdam (NL)
- ❑ Municipality of Bologna (IT)
- ❑ City Council of Gent (BE)
- ❑ Bremerhaven (DE)

Two observer sites (eventually becoming pilot):

- ❑ Ministry of Interiors (SI)
- ❑ Ministry of Communication and Technology (RO)

ICCS Convention of 1976

Convention on the issue of multilingual extracts from civil status records

Article 5:

- Dates shall be ...
- Name of any place ...
- Identity number shall be...
- Indication of sex ...
- Indication of marriage, legal separation, divorce
- Etc...

ECRN Expected results

| Civil Act document transfer | Current situation | ECRN |
|------------------------------------|-------------------------------------|-------------------------|
| Request and response | Via ordinary mail or citizen moving | Electronic transmission |
| Time for obtaining document | 2-3 months | 2-3 working days |
| Errors in transmission | 10% | 0,10% |

ECRN

European Civil Registry Network

Main purpose

The ECRN project deals with the establishment of a pilot among the Civil Acts Registry of National Administrations to allow safe transmission and certain identification of the Civil Acts exchanged among European administrations. Due indeed to the growing number of European citizens living in countries different from their countries of origin, cooperation regarding the Civil State has become today a high priority for national administrations. The project aims at strengthening the administrations' ability to use new technologies, with a view to a major efficiency/effectiveness and inexpensiveness of the local administrative action in the European context. The main target concerns the establishment of an experimental system for the transmission of Civil State and information of the Civil Acts Office among the EU Local Governments.

Major objectives

- For the Administrations, gaining in efficiency in terms of immediate knowledge that a citizen has had a son abroad, or got married, or died in another Country, to manage in a very short time the information on benefits, changes, etc., connected to the events of the civil acts.
- For the Citizens, the possibility to obtain in a very short time Civil Acts. This will allow to European citizens to reply on time to the request of documentation for inscription to schools universities, employment opportunities, public administrations duties, etc.
- Effectiveness of the relationship Citizen-Administration. The request of certification of civil acts from a citizen of a country A, who lives in a country B, should be satisfied in a efficient way and adequate time lap, what is a appreciable improvement of the relation Citizen-Administration.

Information on the service

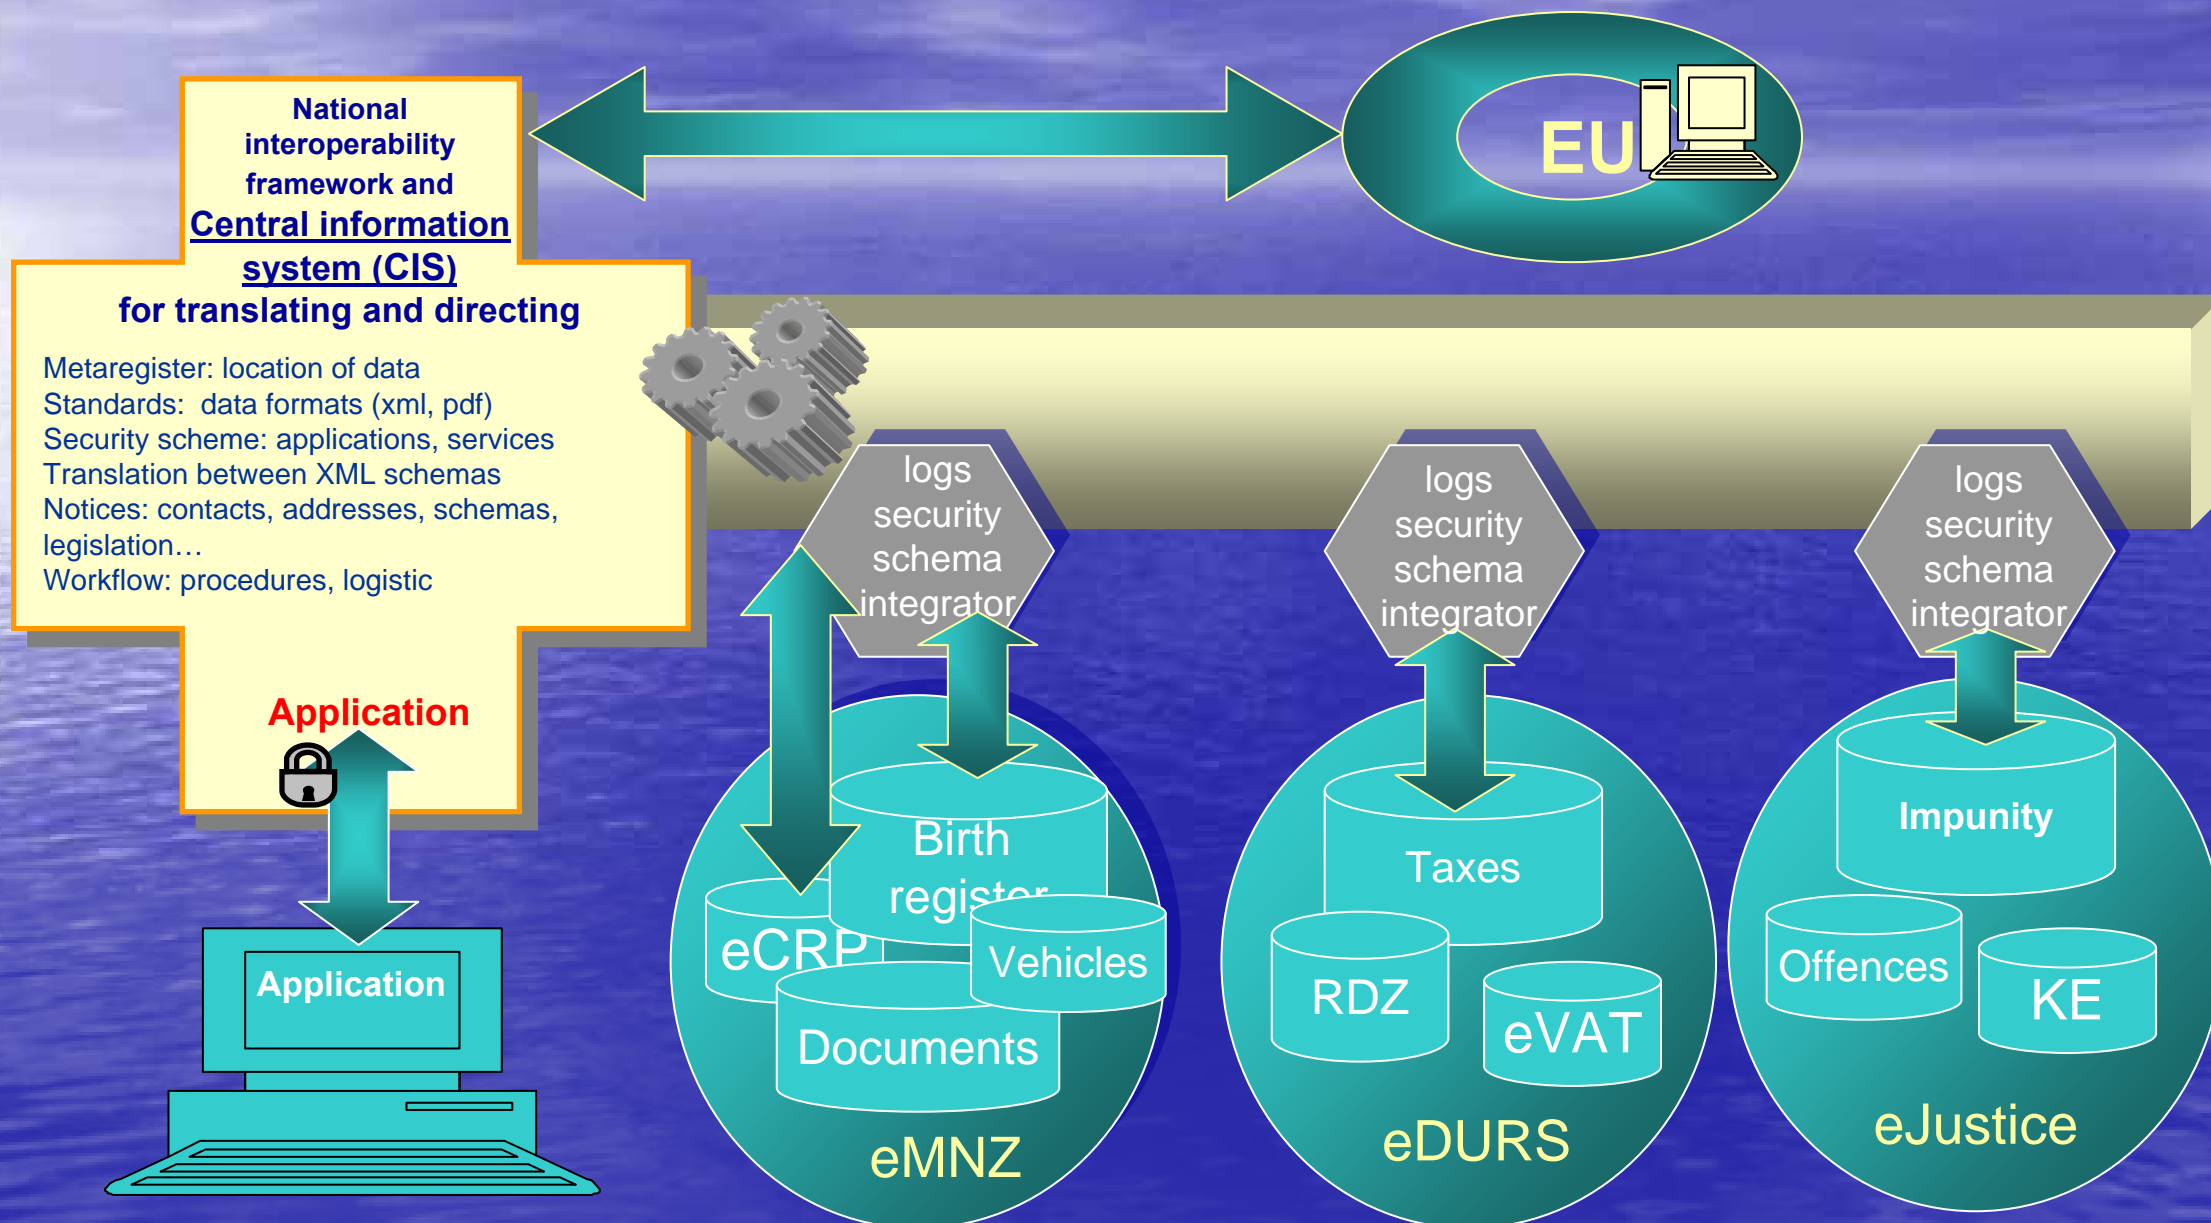

The project deals with the establishment of a pilot among the Civil Acts Registry of National Administrations to allow safe transmission and sure identification of the Civil Acts exchanged among European administrations (Birth, Death, and Marriage). Due indeed to the growing number of European citizens living in countries different from their country where they were born, the cooperation at the subject of Civil Acts Registry is become today an high priority for the national administrations. The project aims at strengthening the administrations ability to use new technologies, with a view to a major efficiency/efficacy and inexpensiveness of the local administrative action in the European context. Starting from a pilot below indicate, the project, using dissemination instruments selected on the way, will broadening his experience and enlarging his possible usage. The main target concerns the establishment of an experimental system for the transmission of Civil State and information of the Civil Acts Office among the EU Local Governments.

INTEROPERABILITY=

Elimination of Administrative Burdens

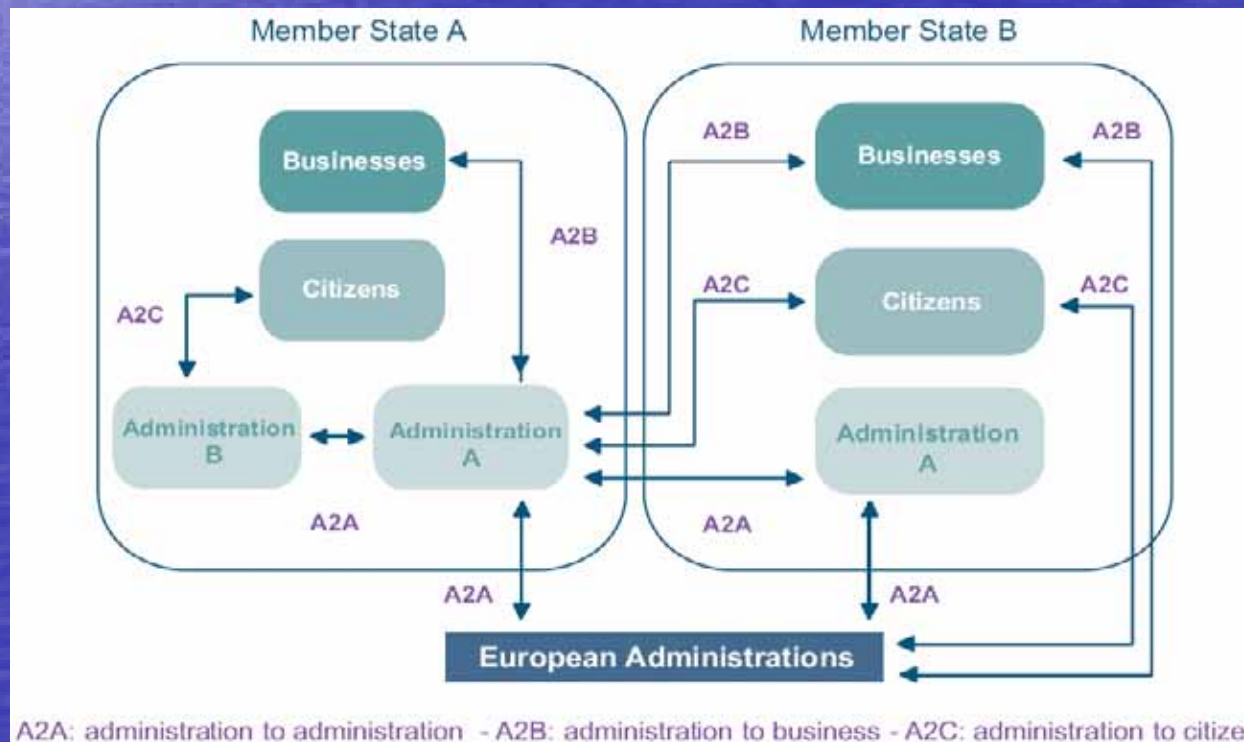

- Extension of Integration to application level
- Innovation of business/process models
- Interactive information
- Standardization of services

Genis National interoperability framework Central information system - CIS

Pan-European e-Government Services

- Definition:
 - *PEGS are cross-border public sector services supplied by national public administrations or EU public administrations provided to one another and to European businesses and citizens, in order to implement community legislation, by means of interoperable networks between public administrations.*

Pan-EU services as pilots

The two services developed as pilots are:

- **Residence report** in Slovenia,
- **Registration of new single member company** in Slovenia

Both services are composed of:

- **preliminary procedure** and
- procedure of carrying out **service itself**

Preliminary procedure is common to both services.

Decision about issued identifiers

Issued identifiers

Based on your application we have issued personal identification number **2601977500932** and tax number **10007121** to you.

In conformity with the Central Register of Population Act, Official Journal of RS, Nº 1/99, we have assigned you the EMŠO. The EMŠO is a personal identification number in the Republic of Slovenia, therefore, we ask you to keep this note. The EMŠO shall be entered in official records and other data collections if thus provided by law, and the administrator shall be liable to quote legal grounds. Unless the EMŠO collecting is provided by law, it may be acquired only from you and by your written approval, but such an administrator shall be liable to acquaint you with the purpose, and allowed to apply data only for this purpose, and he shall not be allowed to communicate them to another person. On the contrary, this can be fined as an offence.

(DECREE on Keeping and Maintaining the Central Register of Population and on Data Acquisition and Communication Procedure, Article 9.)

Please save/print this information for future reference.
